CIRCUIT THEORY AND APPLICATIONS, VOL. 4, 415–416 (1976)

CONTENTS

Volume 4, Issue Nos. 1–4

International Journal of

CIRCUIT THEORY AND APPLICATIONS

Issue No. 1, January 1976

M. J. Chien and E. S. Kuh: *Solving Piecewise-Linear Equations for Resistive Networks* . . . 3

H. Matthes: *Crystal Band-Stop Filters with Improved Spurious Resonance Behaviour* 25

V. Ramachandran and M. N. S. Swamy: A New Canonic Realization of Lossless Immittance Functions Using Six-Element Sections 43

T. Matsumoto: On a Class of Nonlinear Networks 55

SHORT COMMUNICATIONS

J. Solymosi and T. Trón: General Interpretation of Sensitivity Functions 75

D. H. Horrocks and C. Nightingale: The Compatibility of *n*-Ports in Parallel 81

S-K Mark and M. N. S. Swamy: The Generalized Tree for State Variables in Linear Active *Networks* 87

V. Belevitch: On Frequency-Power Relations 93

J. Neirynck and L. Milić: Equal Ripple Tolerance Characteristics 99

Issue No. 2, April 1976

A. S. Perelson: Description of Electrical Networks Using Bond Graphs 107

T. Ozawa: *Topological Conditions for the Solvability of Linear Active Networks* 125

A. Levi and E. Zehab: Stable High Q Active Networks 137

A. J. Gibbs: Optimization of Binary-Transversal Filters with Constrained Sampled Impulse Response 151

J. Kudrewicz: Contribution to the Theory of Weakly Nonlinear Oscillators, Part 1 161

SHORT COMMUNICATIONS

K. R. Laker and M. S. Ghausi: Computer-Aided Analysis and Design of Follow-the-Leader Feedback Active-RC Networks 177

J. R. Jackson and J. D. Rhodes: A Quasi-Steady-State Phenomenological Model for a Transferred-*Electron Oscillator* 185

J. R. Jackson and J. D. Rhodes: A Quasi-Steady-State Approach to the Generation of Non-Sinusoidal Orthogonal Waveforms at Microwave Frequencies 191

P. R. Adby: Component Tolerance Assignment Using the Pseudo-Inverse Sensitivity Matrix . . 199

E. Schultze: Dimensioning the Low-Pass Filters in PCM Terminal Equipment 203

CONTENTS

Issue No. 3, July 1976

L. O. Chua and A. Ushida: A Switching-Parameter Algorithm for Finding Multiple Solutions of Nonlinear Resistive Circuits 215

L. McLaughlin and J. D. Rhodes: Algorithms for the Element Values in a Class of Stub-Unit-Element Cascades 241

V. Tavşanoğlu: On a Relationship Between Howitt and T-Transformations in *N*-Port Passive Reciprocal Networks 273

E. Deprettere: On the Minimal Realization of the Gyrator by Means of Nullors and Resistors. *II* . 285

SHORT COMMUNICATIONS

A. S. Perelson and G. F. Oster: On the Application of Network Theory to Nonisothermal Systems 299

R. Krishnan and T. Downs: A Note on the Computation of Large-Change Multiparameter Sensitivities 307

M. F. Fahmy: Maximally Flat Non-Recursive Digital Filters 311

Book Reviews 314

Issue No. 4, October 1976

H. Flanders: On the Maximal Power Transfer Theorem for *n*-Ports 319

R. Mackay and A. S. Sedra: Sensitivity Evaluation and Comparison for High-Order Active Filters 345

N. Quang A: A Lumped-Distributed Small-Signal Model for a Class of Transit-Time Semiconductor Devices 357

A. Ali and H. K. Kim: RC Ladder Realizations with Equal-Valued Capacitors 371

P. Jarry, Y. Garault and M. Clapeau: Generalized Linear Phase Polynomials—Applications in Filter Synthesis 381

SHORT COMMUNICATIONS

B. D. Rakovich and V. S. Stojanovich: Transfer Functions for Pulse Forming Active Networks with Low Dominant Pole *Q* Factor 399

J. K. Fidler: An Active Biquadratic Circuit Based on the Two Integrator Loop 407

Table of Contents, Volume 4 415

Author Index 417

CIRCUIT THEORY AND APPLICATIONS, VOL. 4, 417 (1976)

AUTHOR INDEX, VOLUME 4

Adby, P. R.: Component Tolerance Assignment Using the Pseudo-Inverse Sensitivity Matrix, 199
Ali, A. and Kim, H. K.: RC Ladder Realizations with Equal-Valued Capacitors, 371

Belevitch, V.: On Frequency-Power Relations, 93

Chien, M. J. and Kuh, E. S.: Solving Piecewise-Linear Equations for Resistive Networks, 3
Chua, L. O. and Ushida, A.: A Switching-Parameter Algorithm for Finding Multiple Solutions of Nonlinear Resistive Circuits, 215
Clapeau, M.: see Jarry, P. and Garault, Y., 381

Deprettere, E.: On the Minimal Realization of the Gyrator by Means of Nullors and Resistors. II, 285
Downs, T.: see Krishnan, R., 307

Fahmy, M. F.: Maximally Flat Non-Recursive Digital Filters, 311
Fidler, J. K.: An Active Biquadratic Circuit Based on the Two Integrator Loop, 407
Flanders, H.: On the Maximal Power Transfer Theorem for *n*-Ports, 319

Garault, Y.: see Jarry, P. and Clapeau, M., 381
Ghausi, M. S.: see Laker, K. R., 177
Gibbs, A. J.: Optimization of Binary-Transversal Filters with Constrained Sampled Impulse Response, 151

Horrocks, D. H. and Nightingale, C.: A Compatibility of *n*-Ports in Parallel, 81

Jackson, J. R. and Rhodes, J. D.: A Quasi-Steady-State Phenomenological Model for a Transferred-Electron Oscillator, 185; A Quasi-Steady-State Approach to the Generation of Non-Sinusoidal Orthogonal Waveforms at Microwave Frequencies, 191
Jarry, P., Garault, Y. and Clapeau, M.: Generalized Linear Phase Polynomials—Application in Filter Synthesis, 381

Kim, H. K.: see Ali, A., 371
Krishnan, R. and Downs, T.: A Note on the Computation of Large-Change Multiparameter Sensitivities, 307
Kudrewicz, J.: Contribution to the Theory of Weakly Nonlinear Oscillators, Part 1, 161
Kus, E. S.: see Chien, M. J., 3
